

FIRELOCK

Fireproof Modular Vaults

Proven Protection in A World at Risk

- Loss of Vital Records can result in severe legal penalties under Sarbanes-Oxley and HIPPA legislation
- 93% of all records are created digitally, and only 30% are printed to paper at all
- In a fire, concrete vaults destroy digital media when high temperatures force steam into the vault chamber

Firelock Vaults offer proven results – delivering the longest media fire protection rating in the industry
